

Ideas and Inspiration Clay blending- Rainbow

1. Select 3 colours of clay and roll them into short sausages. With your fingers put extra pressure on one end of the sausage to form a cone shape.

2. Place the three pieces next to each other, like the teeth on a zip- Left and Right facing up, with the middle piece facing down. Squeeze the clay lightly together.

3. Using your Acrylic rolling pin, roll the clay out to 2-3 mm thickness

4. Fold the flattened clay from top to bottom (the edges of the colours will then overlap) repeat this stage, folding the clay in half as many times as it takes for the colours to seamlessly blend together.

5. Your clay should now look like this. **Faye's tip- only fold vertically otherwise your clays won't blend.**

6. Take care with your cutter positioning if you want your earrings to match perfectly, If you don't, select any piece of the clay you prefer.
